

Epiroc InSite™

Real-time visibility. Total fleet control

Epiroc InSite™

Real-time visibility. Total fleet control.

Maximize uptime and safeguard your assets with advanced tracking for your Epiroc attachment tools.

Epiroc InSite™ provides real-time insights into location, usage, and maintenance needs across your entire mixed fleet. Whether factory-installed or retrofit-ready, it operates on a robust network for seamless connectivity.

Your benefits

Know where your equipment is—always:

Quickly locate attachments, track usage, and check if they're due for service or ready for the next job.

Set jobsite boundaries:

Create virtual fences around your site or yard. Get instant alerts if equipment moves beyond the set area—helping to prevent theft and unauthorized use.

Unified fleet management:

Monitor attachments, regardless of brand or tracking hardware—all from a single platform.

Plan maintenance proactively:

Schedule routine service and repairs to avoid unexpected downtime. Your service provider can track equipment status to keep operations running smoothly.

Seamless system integration:

InSite™ works with most existing fleet management tools and shares data via the AEMP API (ISO 15143-3 standard)—no need to switch platforms.

Report issues instantly:

Use the mobile app to flag problems in the field. The back office and service teams receive immediate notifications for faster support.

Fits new or existing equipment:

HATCON™ comes either factory-installed or added as a retrofit to enhance your current tools.

Built tough & secure

Encrypted data: Your information stays protected in the cloud.

Long-lasting performance: Our telematics devices provide 3-5 years of battery life under normal working conditions.

Simple & fast setup

1. Mount and activate the tracker.
2. Pair your tracker with an asset in InSite™.
3. Start tracking effortlessly.

A stable connection

Epiroc InSite™ operates on the largest Bluetooth network in construction, connecting over 1.3 million devices across jobsites worldwide.
